Agency: Dept. of Agriculture

Subject of possible rule making: Chapter 16-470 (Quarantine -- Agricultural Pests). As a result of a petition for rule making, the department is considering expanding the apple maggot quarantine area in Okanogan County.

Statutes authorizing the agency to adopt rules on this subject: RCW 17.24.011 and 17.24.041.

Reasons why rules on this subject may be needed and what they might accomplish: The apple maggot is an invasive insect pest native to Eastern North America. Its hosts include apples, crabapple, and native and ornamental hawthorn. During the larval stage, apple maggot can cause extensive damage to fruit. It is also economically significant to Washington's apple industry because fruit from the pest-free areas has greater access to international markets.

The department is considering a recommendation by a sub-committee of the Apple Maggot Working Group to expand the quarantine area in Okanogan County. Recent apple maggot surveys provide evidence that the state's apple maggot population has expanded its range into pest-free areas of the county. Changes to the existing rule may better protect the environment and agricultural crops of the state by slowing possible movements of apple maggot from infested areas into the pest-free area, and by securing access to international and interstate markets.

Identify other federal and state agencies that regulate this subject and the process coordinating the rule with these agencies: None.

Process for developing new rule (check all that apply):

- Negotiated rule making
- Pilot rule making
- Agency study
- Other (describe) Department staff will discuss any proposed amendments with affected stakeholder groups.

Affected stakeholders will also have an opportunity to submit written comments on the proposed rules during the public comment period and will be able to present oral testimony at the public hearings.

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication by contacting:
